Problem Statement Title : Application for Assessment of Quality of Textbook/ Reference Books/ E- Book

Impact

- **Misleading Information:** Poor-quality medical books may contain inaccurate or outdated information, leading to incorrect treatment decisions.
- **Hindered Learning:** Medical students rely heavily on textbooks for their education. Low-quality books can hinder their understanding, making it challenging to grasp essential concepts.
- **Compromised Patient Care:** If medical professionals rely on subpar resources, patient care may suffer. Misinformed doctors could make critical errors in diagnosis or treatment.
- **Wasted Time and Money:** Students and institutions invest significant time and money in textbooks. Poor-quality books can be a waste of these resources.
- **Outdated Practices:** Medicine is constantly evolving. Outdated books can perpetuate practices that are no longer considered best standard, potentially endangering patients.
- **Impact on Research:** Low-quality books can affect research quality, as they may not provide the necessary foundation for evidence-based studies.

Proposed Solution

1. We will be developing a website to provide the functionality for assessing the quality of books using predetermined NCISM criteria with mechanism to collect feedback from the global audience.
2. Authors and publishers will be provided with the functionality to submit the book information to the **National Commission for Indian System of Medicine (NCISM)** for review.
3. The NCISM will be provided with the dashboard to assign reviewers for the book. NCISM and CCIM will provide **syllabus** and according to syllabus reviewer will review the book.
4. Reviewers will receive **requests** from the NCISM to evaluate these books (**maximum 3 reviewer per book**). Reviewers have the option to accept or reject the request to review a book. If they **accept**, they will be provided with a functionality to evaluate the book based on various criteria as prescribed by NCISM. These criteria include the credibility of the author, publisher, the physical presentation etc.
5. Once the review is **complete**, the reviewer will send a **detailed report** to NCISM. Then **NCISM will be provided with the mechanism to convene the meeting of the committee** and upload the **final decision** to approve or reject the book to the book publisher.
6. We are developing a Books E-Marketplace for students to buy the NCISM approved books The book publisher will be provided with functionality to manage their books inventory on the provided platform.
7. On the E-Marketplace, we are developing a **feedback** system that will allow **students and teachers(verified)** from around the **world** to share their feedback (based on provided Questionnaires). This feedback will be sent to the NCISM & author/publisher for improving the quality of the books in further editions.
8. Teachers will be provided with the functionality to register on portal, give feedback for the books, recommend books to their students, share the books amongst peers.
9. Colleges readers club will be provided with the functionality to form a group on the portal and the share books review the buyers to buy the books according to their needs.

Objectives

- **Quality Assurance:** Ensure that medical textbooks meet a high standard of quality books.
- **Preventing Poor Quality of Education:** prevent students from falling into the trap of substandard textbooks which can lead to a decline in the quality of education and medical practitioners.
- **Evaluation:** Enable reviewers to review books more accurately with the help of parameter.
- **Guiding Students:** Help students to choose the best textbooks recommended by **Teachers and NCISM**.
- **Global Student Feedback:** Feedback from all students across the globe.
- **Availability of books:** Make books easily accessible to everyone.

Quality books assessment scale

In addition to NCISM parameters here are few additional parameters to maintain quality books, reference books and E-Books.

Sr. No.	Additional Parameters	Total score
1.	Introduce new topics by referencing to what the learner already knows.	10
2.	Pairing graphics with text.	10
3.	Interleaving different but related topics and skills.	10
4.	Practical knowledge.	10
5.	Try to cover complex topics with the help of videos attach video reference by the author itself.	10
6.	Every chapter consist of 5 marks and in addition apply NCISM subject matter parameters.	50
Total Score		100

Parameter for textbook quality assessment scale NCISM [1]

Sr. No.	Criteria	Total score
A	Author Credibility	50
B	Publisher credibility	25
C	In general	14
D	Physical appearance, structured & organisation	130
E	Subject matter	81
F	Language	24
G	Illustrations	28
Total Score		352

Rating Parameter for Student & Teachers

Sr. No.	Parameter	Score
1	How easily book is readable (Language)	50
2	Quality of content in depth, short etc.	20
3	Font size, font style	15
4	Visuals illustrators used	15
Total		100

Modules of Web Portal

Application Form

Authors or publishers can request a to get book review, can receive scores, feedback, and get recommendations through the NCISM.

Reviewer

The reviewer will evaluate the book based on specific criteria, submit a comprehensive report with scores to NCISM, and provide feedback and suggestions to the author or publisher.

NCISM Committee Members

A committee will make the final decision regarding the accuracy of scores and reviews, as well as whether there is any bias, and whether to approve or reject.

Feedback

Students and teachers worldwide can provide valuable feedback and suggestions, and we will analyze sentiment, intent detection and share them with NCISM, authors, or publishers to enhance quality.

Book Marketplace

Books approved by NCISM will be available for purchase in the marketplace and with the help of analytical view on marketplace buyer can purchase the quality of book.

Book recommendation

Teachers will suggest books based on specific university, topics, etc. It will visible under student login and analytics at marketplace.

Teachers module

Teachers will approved himself by the id card, can seen the list of books and also purchases the book from the marketplace, submit the answers of the questionnaire will helps the system to show the analysis.

Student Module

Teachers can access the list of books and also use the book marketplace to purchases the books. With the help of questionnaire teachers can recommend the books to the buyers/Students.

AYUSH

Ministry of AYUSH have access to NCISM functionality.

Methodology

1

The author/publisher sends 5 hard copies of the book to the NCISM for review.

2

As per the domain of the book, NCISM will allot the reviewer.

3

Reviewers have two choices: either accept the book or reject the book to review.

4

If the reviewer accepts the book then the reviewer performs the assessment on the book and sends the score to NCISM and as well as to the author/publisher.

5

The reviewer will send a final report of a book to NCISM and the NCISM committee will make the final decision whether to approve or reject the book.

6

All approved books are available on the book marketplace.

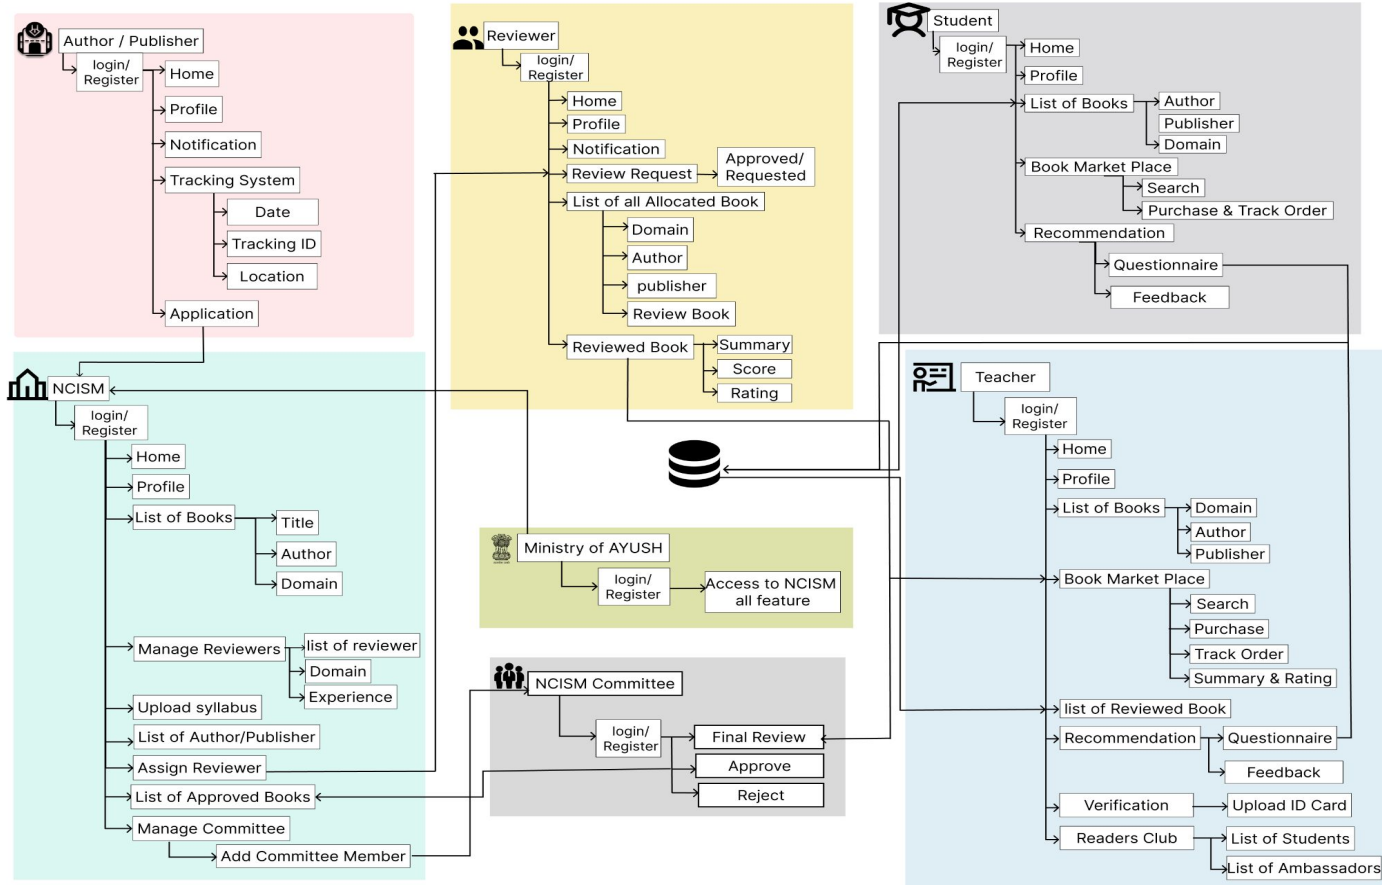

7

Students can purchase the books and submit their feedback on the books.

8

Teachers can buy the books, give feedback, and recommend the books to the students.

Conclusion:

- Providing a Quality textbook/reference book to students.
- Review books online using our system.
- Recommend best books to student by Teachers.
- World wide feedback from all students and teachers.
